PROFILE

Final-year IT student at ISET Radès, specializing in Information Systems Development, expected to graduate in July 2026. Interested in software systems, back-end engineering, and performance-oriented development, with hands-on experience in database design, API development, software architecture, and systems programming. Built and contributed to real-world projects in team environments, with a focus on reliability, clean design, and practical problem-solving.

EDUCATION

Higher Institute of Technological Studies of Radès (ISET Radès) Radès, Tunisia
Bachelor of Science in Information Systems Development Sep 2023 – Present
Relevant Coursework: Algorithms and Programming, Software Architecture, Advanced Databases, and Service-Oriented Architecture.

Lycée Route de la Plage Soliman, Tunisia
Baccalaureate in Computer Science Sep 2019 – Jun 2023
Relevant Coursework: Mathematics, Physics, and Algorithms and Programming.
Mention: Excellent (16.42/20)

PROFESSIONAL EXPERIENCE

SOFRECOM Tunis, Tunisia
Software Engineering Intern (Hybrid, Full-time) Feb 2026 – Present

- Contributing to the development of an internal AI-powered HR platform supporting employee career progression through skills, mobility, and training workflows.
- Implemented initial REST API endpoints and a CV text-processing prototype for keyword extraction to support automated profile workflows.
- Helped translate business needs into initial specs (user flows, data fields, API contracts) and documented early technical choices.

AFTERCODE TUNISIA Remote
Full-Stack Developer (Academic Internships + Paid Collaboration) Jan 2024 – Jul 2025

- Contributed to backend and database design for a multi-role services marketplace, supporting partners, customers, and administrative workflows.
- Built REST API features with transactional logic, optimized PostgreSQL queries, and supported schema updates and data migration work.
- Implemented authentication workflows and role-based access control and frontend interfaces built with Next.js.

PROJECTS

Ishell – custom Linux shell (C++)

Custom interactive Linux shell built from scratch, focused on low-level systems programming and extensibility.

- Implemented command execution using **fork**, **exec**, and **pipes**, with native built-in commands.
- Developed a custom input handler with **syntax highlighting** and **persistent command history**.
- Added Lua-based configuration for **runtime customization** and live reload.

Process Manager for Linux (C++ / FTXUI)

Terminal UI tool to monitor and manage processes in real time.

- Parses **/proc** for per-process and system metrics, supports **CPU/memory sorting**
- Sends **Unix** signals from the UI to manage processes (kill)

CareFlow

Healthcare appointment and clinic-management platform connecting patients, doctors, and admins through a Go API, a web dashboard, and a native Android app.

- Built authentication with **JWT dual-token strategy** and role-based authorization.
- Designed appointment flows (book, reschedule, cancel) and admin configuration, backed by **PostgreSQL** with **GORM** transactions.
- Standardized **validation** and **error responses** across endpoints to keep client workflows predictable.

CERTIFICATIONS

Coding Dojo Bootcamp

Certificate of Achievement in Software Development

Online

Sep 2023 – Jan 2024

Completed a total of 320 hours of intensive practical training in software development, covering core programming concepts, problem-solving, and project-based work.

SKILLS

Languages: TypeScript/JavaScript, C/C++, Go, Python, Java, PHP, SQL

Frameworks & Libraries: Next.js, React, Spring Boot, Express.js, FastAPI

Databases: SQL Server, PostgreSQL, MongoDB

Tools: Linux, Docker, Git/GitHub, Zsh, VPS, Nginx (reverse proxy), Cloudflare

Other: Web Scraping, Software architecture, Performance optimization

LANGUAGES

Arabic: Native

English: C1 (IELTS Academic)

French: C1
